

## VS-MC Series Design Change Notification

Dimensions of VS-MC series (VS-MC4, 6.5, 10, 25, 35, 50, 75) has been changed as follows.

- ① To increase robust mechanism, change the diameter to  $\phi 31$  from  $\phi 32$
- ② Adding knurling on camera mount part
- ③ Adding slitting on the tip of lens

By these changes, it will be easier to install these products in small space and robust mechanism will be increased.

There is no change on optical performance and price.

We will deliver this new design models once the old models sell out.

Please contact our sales department for more detail.

We appreciate your understanding and we look forward to your continued business in the future.
